താഴെപ്പറയുന്നവയാണ് കമ്മിഷന്റെ ശുപാർശകൾ :

(i) Only persons of a backward class traditionally engaged in the hereditary occupation of that backward class will be excluded from creamy layer. There will not be any enblock exclusion of any backward class on the basis of the here ditary occupation of that backward class.

(ii) The gross income for exclusion of backward classes as Creamy Layer is fixed as Rs.3 lakhs or above. The scheme of criteria for exclusion as creamy layer is that under categories I,II,III, and VA, (Vide Annexure II) the exclusion is on the basis of status and not in terms of gross annual income. In the case of a category for which the gross annual income as mentioned in category VI is the criterion income from salary or income from agricultural holdings should not be taken into account.

(iii) On the ground of social backwardness persons traditionally engaged in the hereditary occupation of all backward classes are excluded from creamy layer.

(iv) On the ground of educational backwardness, all backward classes who have not successfully completed lower primary education are excluded from creamy layer.

(v) Recruitments to all posts where the salary is paid from the Consolidated Fund of the State will be groverned by the principles of reservation for backward classes.

(vi) When there are persons, in the rank list or supplementary list waiting for appointment nobody temporarily recruited should be allowed to continue to work.

(vii) Clear instructions regarding the criteria for exclusion of creamy layer should be issued to the Revenue authorities. At any rate a creamy layer certificate will have to be issued or refused within ten days of the receipt of application for the same.

(a) only irrigated land which is equal to or more than 85% of the statutory ceiling area, or

(b) both irrigated and unirrigated land, as follows.

The rule of exclusion will apply where the pre-condition exists that the irrigated area (having been brought to a single type under a common denomina-tor) 40% or more of the statutory ceiling limit for irrigated land (this being calculated by excluding the unirrigated portion). If this pre-condition of not less than 40% exists, then only the area of unirrigated land will be taken into account. This will be done by converting the unirrigated land on the basis of the conversion formula existing, into the irrigated type. The irrigated area so computed form unirrigated land shall be added to the actual area of irrigated land and if after such clubbing together the total area in terms of irrigated land is 85% or more of the statutory ceiling limit for irrigated land, then
